

BUSINESS POLICY

Providers of integrated and customized solutions in Digital Infrastructure, focusing on Data Centers, we constantly seek excellence in providing services, promoting customer relationship and integration and making efforts to achieve the best results, based on the procedures set out in the Quality Management System and on the following guidelines:

- Offer a solution that is adequate to the needs and specifications of each customer;
- The relationship with our customers, partners and providers are always formalized, so that each party is aware and enforces its rights and duties;
- Continuously monitor the solution quality control, enabling deployments in accordance with the services engaged, and ensuring full compliance with all technical standards and legal rules applicable to our activities;
- Provide maintenance services (continuous operation of Data Centers), promoting initiatives focused on a long-term partnership;
- We seek technical, organizational and intellectual improvement at all times, keeping ourselves updated and at the forefront of technology, and providing our customers with innovative solutions, based on a continuous improvement philosophy.

Eduardo Marini
