

POLÍTICA EMPRESARIAL

We are a leading technology and digital infrastructure solutions company that is present throughout Latin America.

We are committed to developing products and services to accelerate the digital transformation of companies and cities, enabling a more sustainable future for the planet.

We prioritize management guided by ethics, transparency, and sustainability, with all our routines aligned with the ESG (Environment, Social, and Governance) agenda.

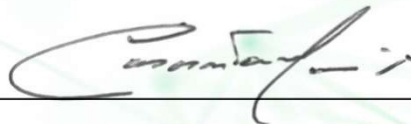

We actively contribute to the construction of a low-carbon global economy, collaborating with the reduction of energy consumption in data centers and technological ecosystems.

We have established excellence as a standard in the provision of our services and in the sale of products, with continuous monitoring of the quality of customer service, always aiming at mastery.

We adopt the philosophy of continuous improvement of our processes, constantly investing in the technical and intellectual improvement of our employees and partners, in order to provide customers with energy-efficient, safe, innovative, sustainable and highly available products and services.

We carry out a strict monitoring of delivery times, technical standards and requirements applicable to operations, customers and other stakeholders

We value long-term relationships in order to create shared value with all our stakeholders, always acting with transparency and guided by respect for the environment, social responsibility, vision of the future and impeccable ethical conduct in business.

Eduardo Marini
CEO
